## $4^{\text {th }}$ quarter 2022

## A sharp increase in sales volume

For the fourth quarter of 2022, the LabelVie Group recorded consolidated revenues of MAD 3,729 million, up $\mathbf{2 2 \%}$ compared to the same period last year.

This increase is mainly due to :

- An aggressive sales policy designed to support the purchasing power of its customers against an inflationary environment.
- The success of the Atacadao format, which offers highly discounted prices.
